-------	-----	----------

Design a class called FoodItem and OrderManager with the necessary properties so that the following driver code produces the given output. The instance variables in FoodItem class must be private.

Tester Code	Expected Output
<pre> public class OrderTester { public static void main(String[] args) { OrderManager user1 = new OrderManager("Rafi"); System.out.println("=====1====="); OrderManager user2 = new OrderManager("Nabila", 3); FoodItem f1 = new FoodItem("Burger", 150); FoodItem f2 = new FoodItem("Pizza", 300); FoodItem f3 = new FoodItem("Pasta", 200); System.out.println("=====2====="); user1.addOrder(f1); System.out.println("=====3====="); user1.addOrder(f2, f3); System.out.println("=====4====="); user1.showOrders(); System.out.println("=====5====="); user1.removeOrder("Burger"); System.out.println("=====6====="); user1.showOrders(); System.out.println("=====7====="); user1.removeOrder("Steak"); System.out.println("=====8====="); user1.removeOrder("Pizza"); user1.removeOrder("Pasta"); user1.showOrders(); System.out.println("=====9====="); user2.showOrders(); } } </pre>	<pre> Welcome Rafi to Food Ordering System =====1===== Welcome Nabila to Food Ordering System =====2===== Rafi ordered Burger. =====3===== Rafi ordered Pizza. Order limit reached! =====4===== Customer Name: Rafi Maximum Orders: 2 Total Orders: 2 Ordered Items: Burger Pizza =====5===== Order for Burger removed. =====6===== Customer Name: Rafi Maximum Orders: 2 Total Orders: 1 Ordered Items: Pizza =====7===== Steak not found in order list. =====8===== Pizza not found in order list. Order for Pasta removed. Customer Name: Rafi Maximum Orders: 2 Total Orders: 0 Ordered Items: =====9===== Customer Name: Nabila Maximum Orders: 3 Total Orders: 0 Ordered Items: </pre>
